

BED SCREEN CURTAINS

MACTRAC CURTAIN CHANGING CASSETTES

mactrac
the *architects* choice

The Mactrac curtain changing cassette is a unique patented device that allows for the quick and easy changing of bed screen curtains.

Using a patented spring locking and releasing system, the cassette is actually a section of track that can be removed with the curtain attached.

The cassette is then reintroduced to the track with the clean curtain ready for immediate use.

Using the Mactrac curtain changing cassette system, curtains at any height can be changed from the floor. The specially designed loading/unloading tool means there is no need for steps or ladders, saving time and ensuring safety.

Cassettes are available for both the Mactrac Pro (Mac9) and Pro Plus (Mac10) bed screen track systems. These are produced in 400mm and 600mm sizes which hold 2700mm and 5000mm of curtain material respectively. The two cassette sizes are available for both the Mactrac Pro and Mactrac Pro Plus.

All parts are aluminium or stainless steel, making the cassettes strong, durable and maintenance free.

Mactrac curtain changing cassettes can be installed on ceiling fixed or suspended tracks. In hospital situations we recommend they are located at the end of the track run, at the foot of the bed.

This allows the curtains to be changed with a minimum of disruption to the patient and it's quicker because the work area is clear.

Note that the cassettes can also be installed on Mactrac Ezi-Slide moveable tracks.

NZ patent no. 337116

Australian patent application no. 51865/00

USA patent no. 6536091

Where Mactrac curtain changing cassettes are fitted, the Mactrac Warranty of Quality applies when they are installed by a qualified Mactrac approved installer.
